Legacy Hot Holding configurator USB tips

USB Programming Recommendations / Guidance

To support successfully USB loading a recipe file to the Duke Holding Units models (FWM, MUHC, HSHU, IRHS):

- Always ensure the name of the USB recipe file is "HMC34.CFG". No other file name or file format will be accepted.
- Always insert the USB drive in to the holding unit while power is OFF to the holding unit. Then power ON.
- Use the Duke provided GREEN or BLUE USB stick you received with the original shipment of your holding unit.
- If an alternative USB brand must be used:
    - It should be formatted to FAT32 File system.
    - Do not use any USB with a capacity larger than 16GB
